Reality Labs - Operations (IC)

Initial Interview Guide

Meta

Welcome to your preparation guide for your interview at Meta! This guide will take you approximately 15 minutes to review. Use the table of contents below to quickly jump to the section you are looking for. Whether you're taking your initial screen or your full loop interview, our Operations leaders and recruiters put together this guide so you know what to expect and how to prepare. We recognize that interviewing can be stressful, so we hope this guide provides the information and resources you need. Remember, your recruiter is there to support you, so please reach out to them with any questions.

Accommodations process

Meta is committed to providing reasonable support (called accommodations) in our recruiting processes for qualified candidates with disabilities, physical conditions, mental health conditions, neurodivergence, sincerely held religious beliefs, pregnancy, childbirth, or related medical conditions, as required by law. If you need assistance or require an accommodation, reach out via the Accommodations request form.

Team introduction

The Strategy & Operations team is the centralized hub for all strategy and operations for product, engineering, and the business teams. This team partners with leadership to help them grow, scale, and run their organizations effectively and make the most strategic decisions possible.

Interview process overview

This guide will explain what to expect during your interviews with Meta. As part of your interview, you will have the opportunity to meet with peers, cross-functional partners, and other leaders at Meta. Your recruiter will be your guide throughout the process and aim to adequately prepare you to bring your best self to your interview.

What will your interview process be?

Your initial screen will consist of a 45-minute discussion with an engineering leader and will cover the breadth of your technical expertise and provide insight into domain specificity. This will be a conversation in which your interviewer will ask you questions that will allow you to drive the conversation.

During this conversation, we know you're also trying to determine whether Meta is right for you and is this the right next step in your career. Your interviewer will spend time seeking to understand your interests, and will dedicate time to answering your questions, aiming to provide insight into a career path at Meta.

- Cross-functional Collaboration
- Assess ability to work with colleagues from other disciplines as peers
- Be prepared to discuss your previous work

Video Conference interview best practices

- Make sure you're in a quiet environment.
- Double check that you have a reliable internet/phone connection.
- It's okay to ask the person you're speaking with to speak slowly if you can't catch what they're saying.
- You'll need a laptop with a webcam, speaker, and mic. We recommend using a headset or headphones with a mic for better quality audio, but this is optional.
- While we embrace the usage of advanced tooling in our day-to-day work to build the future of social connection, we ask that you not use any unauthorized outside assistance during interviews. Throughout the interview process you may be asked to share your screen via Zoom. Here you can find guidance on how this works. Additionally, we ask that you disable and not use filters during your interview. This will help us get an understanding of how you approach problem-solving and coding independently. Outside assistance includes, but is not limited to, consulting external resources, seeing help from others, or using

AI tools, like ChatGPT.

- For your interview, ensure Zoom screen sharing is enabled in advance, as setup may require a few minutes. Here's how: Enable Zoom screen share.
- A filter is considered any tool/feature that applies visual effects to your video feed, including virtual/blurred background.

Interview Dress Code

As you're probably aware, we promote a casual environment at Meta so that everyone can be their authentic selves. Formal dress is not required (jeans are definitely ok!). Dress comfortably. We care about what you can do, not what you wear.

Initial Interview Overview

What can you expect?

This part of your discussion will focus on sharing real examples of high stakes projects you've led, indexing on technical experience and stakeholder management.

What do we look for?

Your interviewer will be thinking about how your skills and experience might help Meta. During your initial screen, your interviewer will seek to understand your skills by assessing three focus areas:

• Scalability and Scope: How do you design impactful solutions that account for scale, efficiency and XFN needs? How do you define requirements, identify, and mitigate potential risks?

• XFN Collaboration: How do you form collaborative partnerships with a wide range of stakeholders and manage challenging relationships? How do you work through differences and drive solutions that address issues while considering others' perspectives, needs, and goals?

- Additionally, your interviewer will take time to understand your unique background, expertise, interests, and career goals. They will also provide insights into the benefits of an engineering career at Meta in terms of potential career growth and opportunities to influence critical project work.

How to prep

Questions will be behavioral in nature, focused on asking you to describe a specific situation, the role you played, and the outcome.

- Consider high impact projects you'd like to share, emphasizing the scope of the project and decision making.
- Consider your preferred domain expertise and what excites you about it.
- Consider situations where you've collaborated with a diverse group of 3 stakeholders to drive projects to

completion. A significant portion of the conversation will be around how Meta fits your needs and areas of interest.

- Prepare questions to gauge how your unique expertise can be utilized at Meta.
- Consider career experiences you'd like to have and prepare questions to understand how Meta fits into your goals.

Final tips for your interview

- **Be yourself.** This means being open and honest about your successes and ways you've improved throughout your career. Also, be sure to call out how you have specifically added value to your team or projects you've contributed to. We value teamwork and what each individual member brings to the table.
- **Carefully review and familiarize yourself with the job description and perform research on Meta and the role.** Be prepared to answer why you are interested in this specific role and in working at Meta.
- **Please take the time to review our mission statement and core values.** These values influence how we work together to fulfill our mission to build the future of human connection and the technology that makes it possible. We also encourage you to take time using our technologies such as Facebook, Instagram, Messenger, and WhatsApp.
- **One important piece of advice for your interviews: it's ok if you don't know!** No one who works at Meta is an expert in all things, and we don't look for perfection in the people we interview. If you aren't sure of something during your interview, you're encouraged to ask clarifying questions and be upfront if there are topics that you have less experience with.
- **Prepare thoughtful questions for the interviewer(s).** Your interviewer may challenge your ideas, and you should be ready to speak not only to what you recommend or have experienced but the why as well. It is important to think outside the box and to approach problems from creative and different perspectives.

Post interview – What to expect

You can expect your recruiter to provide a specific timeline or updates along the way. Your recruiter will inform you of next steps after your interview as soon as they are available. Feel free to follow up with them if you have not heard within a week of your interviews.

Appendix / Resources

Below is a curated list of resources to get started and help you prepare.

Product Overviews

- Meta Quest 3
- Meta Quest Pro

- Ray-Ban Meta Smart Glasses
